

realSafe Parental Control

Get the Best Online Protection for Your Children!

According to a 2005 study, 70% of teens were accidentally exposed to inappropriate content online. With the ever increasing number of online threats, it has become imperative that parents provide a child friendly online environment. A simple Google search uncovers more than 200 million porn sites. At least ten percent of the Web comprises adult content and with over 500 million registered domains, some simple arithmetic reveals that we are potentially talking about a population of 50 million adult sites. As if this huge number were not enough, pornographic websites are constantly growing and changing.

It is no doubt that the Internet has become the leading resource for educational research but it does unfortunately also expose our children to undesirable content. As a developing society we all need to work together and ensure that measures are put in place to help protect our children while enjoying the World Wide Web.

Real Image Internet is proud to introduce an addition to our family of products… realSafe Parental Control. realSafe Parental Control has been specially tailored to ensure that children can enjoy the Internet without being exposed to undesirable content.

realSafe Parental Control helps you protect your children from cyber bullies, predators and adult-oriented websites, so that they can enjoy a safe and age-appropriate online experience. An online victimization study reports that one in seven children aged 10 to 17 has been sexually solicited online. Do you still think our children are safe on the Internet? realSafe Parental Control easily places you in the Internet-safety driver’s seat through the following critical control features:

- realSafe PC allows you to manage the content your children are exposed to when surfing the Internet.
- realSafe PC uses a smart Internet filter that provides your children with strong online protection.
- realSafe PC classifies the category of the websites surfed by your child via a number of technology layers that work together to provide the best online protection.
- realSafe PC has 10 child-oriented filtering categories. You can easily configure which categories you want to allow or block for each of your children, using realSafe PC Personal Profiles.
- realSafe PC uses different techniques for content classification depending upon the category. This is what makes PureSight PC such a robust tool in helping protect your child from potentially harmful Internet content.
- realSafe PC eliminates the threat of Instant Messaging predators or cyber bullies by tracking conversations and blocking suspicious partners
- realSafe PC blocks access to inappropriate web sites in 10 different content categories, including "Porn,” "Gambling,” “Social Networking” and “Drugs.”
- realSafe PC allows you to receive real-time alerts profiling your child’s complete web surfing activities.
- realSafe PC limits time spent online by restricting Internet usage to specific dates and times.

realSafe PC uses different techniques for content classification depending upon the category. This is what makes realSafe PC such a robust tool in helping protect your child from potentially harmful Internet content. realSafe Parental Control - the best protection for children online.
